# Minneapolis 2040 Transportation Direction

Minneapolis Transportation Action Plan | Department of Public Works | March 2019

## MINNEAPOLIS 2040 COMPREHENSIVE PLAN

Over three years, City staff engaged with thousands of community members about the goals, topics, policies, and actions of the [Minneapolis 2040 Comprehensive Plan](#). Feedback collected through Minneapolis 2040 helped form the vision for transportation in the city; this feedback will also inform strategies developed in the Minneapolis Transportation Action Plan.

The 2040 Plan engagement effort focused on hearing from people from a variety of backgrounds, with a focus on communities that have been historically underrepresented. The City received **more than 2,200 comments** on transportation in planning process while developing Minneapolis 2040.

Most comments offered support for improving transit, walking, and bicycling, and expressed support for related policy items. Some comments offered concern that a focus on transit, walking, and bicycling would negatively impact people who rely upon driving or was not a realistic future to pursue.

### THEMES

*We need to aggressively expand clean transportation options to reduce our impact on climate change.*

*Keep the streets safe for everyone!*

*The City needs to invest resources into programs that are equitable in supporting people of color and indigenous communities.*

*Transportation options besides driving should be strengthened before driving is discouraged.*

# MAJOR TRANSPORTATION DIRECTION FROM MINNEAPOLIS 2040

City staff documented and considered all comments made during the Comprehensive Plan development. In December 2018 the City Council approved the Comprehensive Plan for submission to Metropolitan Council.

Reduce the energy, carbon, and health impacts of transportation through reduced single-occupancy vehicle trips and phasing out of fossil fuel vehicles.

Eliminate fatalities and severe injuries that are a result of crashes on City streets by 2027.

Ensure that the quality and function of the transportation system contributes to equitable outcomes for all people.

Support, build, and maintain a multimodal transportation system that promotes growth in a sustainable manner and prioritizes walking, biking and transit.

All transportation-related policies will be addressed in the Minneapolis Transportation Action Plan through strategies and actions developed in seven topic areas: Advanced Mobility, Pedestrian, Bicycle, Transit, Freight, Street Operations and Street Design.
